

1 Header & Typography Section

What is done?

1. A large heading is created using display-4 to make it stand out.
2. A sub-heading uses text-uppercase to convert text into capital letters.

Why is it used?

- To show importance of the page title.
 - To practice typography-related classes.
-

2 Important Notice Text

What is done?

1. The main paragraph uses lead to make it slightly larger.
2. A key sentence is highlighted using fw-bold and text-danger.

Why is it used?

- To make attention text more visible.
 - To show how emphasis utilities change the look of text.
-

3 Muted Footer Line

What is done?

1. A soft (light color) line is added using text-muted.
2. Italic style is applied using fst-italic.

Why is it used?

- To show how to style supporting information.
-

4 Alerts (Success, Warning, Danger)

What is done?

1. Three alerts are placed with different colors (success, warning, danger).

2. Warning alert has a close button using .btn-close.

Why is it used?

- To display different kinds of messages.
 - To show dismissible alert functionality.
-

5 Collapse Section (Show/Hide Content)

What is done?

1. A button triggers hidden content using data-bs-toggle="collapse".
2. The hidden section appears with .collapse, .border, .p-3.

Why is it used?

- To hide long information until needed.
 - To demonstrate Bootstrap's interactive components.
-

6 Accordion Section (FAQ)

What is done?

1. Three questions are added inside an accordion layout.
2. Only one question opens at a time (controlled by data-bs-parent).

Why is it used?

- To organize FAQs neatly.
 - To show use of multi-level collapsible elements.
-

7 Three Cards Section (Courses)

What is done?

1. Each card contains an image, title, text, and button.
2. One card also includes a footer for additional details.

Why is it used?

- To show how cards are used to present content visually.
 - To practice card layout with images and buttons.
-

8 Grid Layout (Services Section)

What is done?

1. Four services are displayed using responsive grid classes (col-lg-3, col-md-4, col-sm-6).
2. Each item is styled with .bg-info, .p-4, .text-white.

Why is it used?

- To understand how grid adjusts for different screen sizes.
 - To create equal-sized blocks cleanly.
-

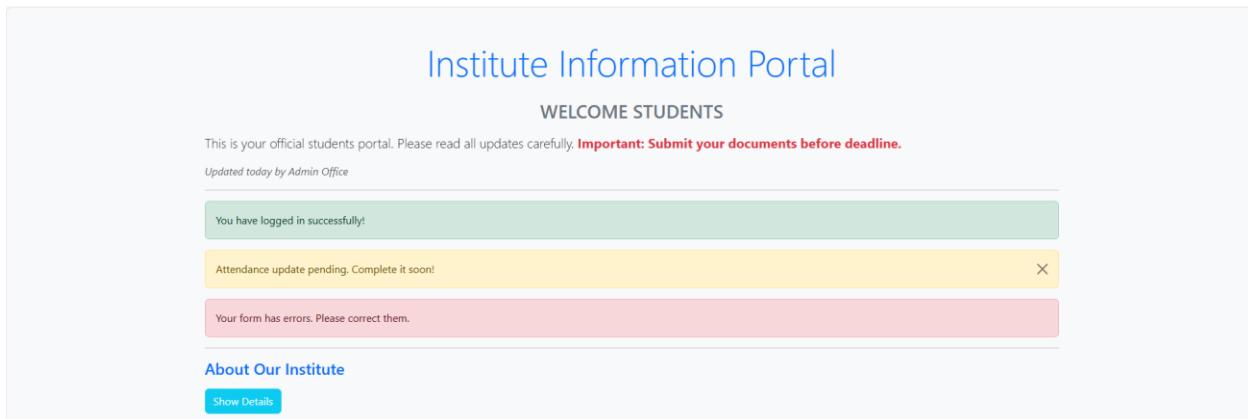

9 Flexbox Footer

What is done?

1. Footer uses d-flex to arrange items in a row.
2. Items are spaced using justify-content-between and centered using align-items-center.

Why is it used?

- To demonstrate alignment using flex utilities.
- To create a clean and organized footer section.
